Other art of interest to pulsed plasma processing includes Walther et al (2004/0016402 A1), which is not prior art; Hunger et al (2001/0041230 A1), who uses B halide precursors, but has no significant monitoring/control disclosure; and Tomioka et al (5,897,713), who may employ BCl₃ reactants, perform CVD processes and control dissociation in pulsed plasmas, does not discuss monitoring/control as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
